TOKO

Digital Audio Player

The Toko Digital Audio Player offers the flexibility of digital audio combined with traditional CD player functionaility.

The Plinius Toko is a DLNA compatible Digital Network and Compact Disc Player with Ethernet connectivity. The Toko enables users to access digital files that are available on their network but also offers the traditional CD Player functionality.

The Toko shares the same DAC as the Tiki offering 24 bit, 192ks/s capability ensuring the popular files types such as FLAC, LPCM, AIFF and MP3 are all catered for.

With the Toko you can access stored digital files yet still retain the integrity and quality of great sound reproduction that you have come to expect from your traditional source materials.

Designed for control with the Plinius Arataki Application.
